

"THERE IS NOTHING ELSE COMPARABLE ON THE MARKET"

Having worked with HD Sharman since 1999, KB Buildings Ltd still maintain that the Plygene Gutterline® system is simply "the best in the market".

The Essex-based company specialise in bespoke steel frame buildings for industrial, commercial and agricultural use across the UK, with commissions ranging from complete new constructs to all types of renovation. One reason for their continuing success is their refusal to compromise on quality, a core value which extends to all suppliers. KB Buildings aim to deliver each project on time, on budget and to the highest standards, allowing no margin for error. With much of the UK notorious for its wet, windy climate, guttering has to be 100% effective, particularly for large industrial buildings, which can be difficult to access and costly to repair in the event of leakage.

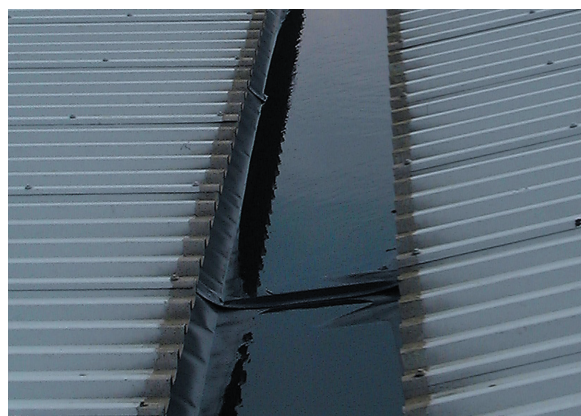

Keith Bartlett, owner of KB Buildings Limited was impressed by Plygene Gutterline® right from the outset "There is nothing else comparable on the market. It is simply the best thing available. We use Plygene Gutterline® on most of our customer projects, industrial and agricultural buildings, even new builds."

"GUTTERLINE IS OUR INSURANCE POLICY...IF YOU FIT IT PROPERLY, IT WILL NOT LEAK, EVER!"

Keith explains the benefits of installing Gutterline, "We only have to do the job once and there is no comeback, which is a great time and cost saving benefit for us." We install Plygene Gutterline® on all industrial jobs as a sort of insurance policy. For example, large valley gutters would cost a fortune to replace so Gutterline is our insurance policy that they won't leak, ever! And on old buildings it is the only product on the market that is suitable."

"WE CAN FIT AND FORGET IT!"

As far as Keith's concerned, his company is unlikely to use any other product. "What else can I say? It is just brilliant. It is the only thing that I've ever come across that does such a good job. There are no joints with Plygene Gutterline®, which removes the potential for leaks. As HD Sharman say on their website, if you fit Gutterline properly it stops gutters leaking, for good. And it is true."

Keith also finds Gutterline easy and quick to install. "We watched their installation video and find our only problems come with access to roofs and what you find when you get up there. Fitting the product is simplicity itself."

But quality is not the only factor Keith appreciates. "HD Sharman is also a really nice company to work with. Their service is excellent; they deliver on time and manage our expectations well. What more can I say? Great job every time."
