

ACCORDING TO MT CONSTRUCTION, "NOTHING WORKS LIKE PLYGENE GUTTERLINE®"

MT Construction of Colchester have been approved installers of Plygene Gutterline® since 1998. "I went to HD Sharman's for some training on a gutterlining job," says Mick, "and I've never looked back. It has now become a significant part of our business."

Mick's construction company works on industrial and commercial buildings and has in the past tried several traditional building cures for leaking gutters, including sealants and patch repairs. "But nothing works like Plygene Gutterline®," insists Mick. "Having worked with HD Sharman for many years now, I couldn't speak highly enough about their products. In fact we often get called out on jobs where other products have failed to stop the gutters leaking. Plygene Gutterline® doesn't fail."

**"PLYGENE GUTTERLINE® HAS NO JOINTS....
SO AS LONG AS WE INSTALL IT CORRECTLY,
IT WORKS PERMANENTLY"**

According to Mick, the single biggest advantage is that Gutterline comes supplied on a continuous roll, with no joints. Mick explains, "Anything with joints will always have the potential to leak. Plygene Gutterline® comes made to measure, as a single piece of pliable liner, which is why it doesn't leak."

HD Sharman's method of fitting Gutterline ensures a better, longer-lasting result. "As long as we install it correctly, it works permanently," explains Mick who is also very impressed with the efficient service. "HD Sharman always interprets our orders correctly. They are spot on every time!"

Naturally, Mick expects the partnership to endure for many years to come, just like the Gutterline product itself. "We've never had a problem with Plygene Gutterline® and HD Sharman does the right things at the right time. What more can we ask?"
