In 2022, we trained:

388 people on Plygene®, from **132 companies**
225 people on Delcote and Seamsil from **74 companies**

Midport Construction Limited was one of the first companies through our training facilities this year, as we continue to offer **FREE training** to contractors on both **Plygene and Liquid Coatings**.

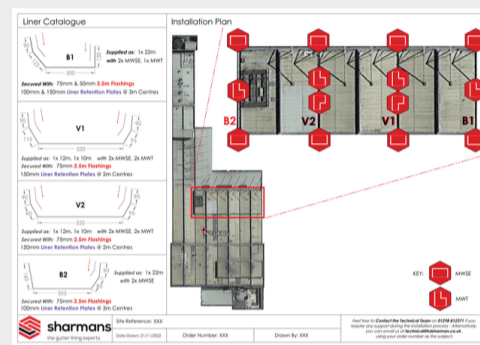

[GET TRAINED TODAY](#)

We are pleased to announce that we are listed on the new **TAP** for Roofing website, which launched on **January 25th**.

Building Plans

We are introducing bespoke building plans with your **Plygene® Gutterline** order to make installation even easier.

Our new plans include:

- Quick access to the gutter reference location
- Flashing locations within the gutter and what lengths they are supplied in
- LRP location within the gutters & how many need to be installed
- Gutter liner lengths (if split)

LRPs:

Our new **liner retention plates (LRP's)** replace wind uplift restraints on our market leading gutter refurb system.

How do our new LRPs improve Plygene® Gutterline?

- LRPs leave the base of the gutter clear, eliminating any potential interference with the gutter flow
- Quick and easy to install, saving valuable labour time
- LRPs make cleaning and maintaining the gutter much easier
- Now available in 13 sizes
